Responsive Web Design, freeCodeCamp, July 2024, [ernest-jere-rwd](#)

EDUCATION

BSc (Hons) Computing and Its Practices, The Open University, UK, (Oct 2008 – Sept 2012),
Field of Study: Computer Science,
Coursework:

- Interaction Design
- Software Engineering with objects
- Developing Concurrent Distributed Systems
- The Computing Project - JAVA

Printing Technician Certificate, The Malawi Polytechnic. (1994 - 1998),
Field of Study: Printing Technology,
Coursework:

- Lithography
- Desktop Publishing
- Graphic Layout and Design
- Graphic Reproduction

Ernest Jere

B.Sc. (Hons) Computing and Its Practice (Open)

UX Designer & Frontend Developer. 10+ Years Design Precision Prepress (DTP) - Figma, HTML, CSS, JavaScript, ReactJs, Adobe.

PROFESSIONAL SUMMARY

Detail-oriented UX Designer & Frontend Developer leveraging 10+ years of high-precision prepress (DTP) expertise to build scalable, component-based architectures in ReactJs, JavaScript, HTML, CSS, and Figma.

EXPERIENCE

Independent Study & Freelance Designer, Melon Impressions,
January 2022 – Present, Krugersdorp, South Africa

- Architected and deployed responsive web applications using HTML5, CSS3, and JavaScript, transitioning 10+ years of print design expertise into a modern component-based architecture using ReactJs
- Designed and prototyped high-fidelity UI/UX mockups in Figma, ensuring seamless handoff from design to code while maintaining the "pixel-perfect" standards honed in professional DTP prepress environments.
- Created "Press-Accurate" Visuals: Transforming 2D flat designs into hyper-realistic 3D digital mock-ups and physical prototypes so the client can visualize the final product.

Operations Manager, Max Media,
March 2018 - March 2022, Windhoek, Namibia

- Led printing department of 20 staff, overseeing daily production and quality control for multi-title publishing operations.
- Implemented quality control procedures and standard operating procedures, lowering error rates and improving delivery times by 50%.

Head of Prepress Operations, Dikgang Publishing Company,
July 2001- April 2017 Gaborone, Botswana

- Directed upgrade from film-setting to Computer-to-Plate (CTP) system, cutting plate production time by 50% and reducing per-run costs by 30%.
- Designed and prepared print-ready artwork and templates for magazines and newspapers; introduced standardized workflows to reduce rework and improve throughput.
